

Pipe stand with high capacity

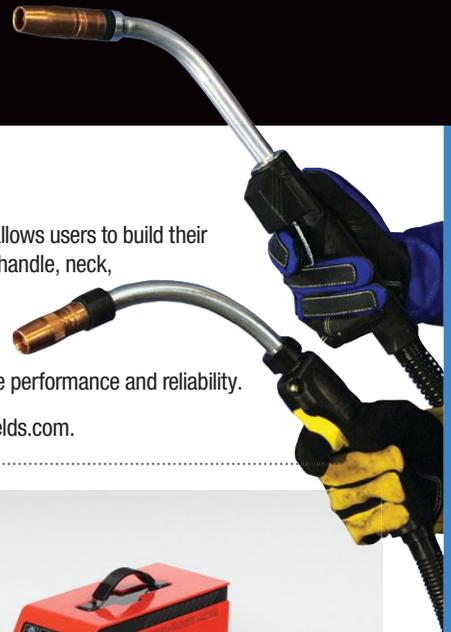

All the strength you will ever need and three different head options. The Sturdi-Jack II folding pipe stand D675 has a 2 in. to 16 in. capacity with a 2,500 lb. load limit. Minimum height is 29 in. and height is maximum 50 in. Smooth folding action means quick setup and teardown and easy transportation between jobsites. It has a high-visibility neon green finish for safety.

Welder delivers versatility

The Multiplaz 3500 uses a water-alcohol solution instead of shielding gas. It is the first tool to utilize ordinary tap water for heating materials by turning the water into plasma 14,400 F (8,000 C). The Multiplaz 3500 can weld, cut both metal and non-flammable materials, and despite its low power consumption, the advanced portable machine can concentrate its plasma stream into a small diameter jet like a laser.

Multiplaz, Palm Desert, Calif., 760/346-8552, www.multiplaz.com.

High performance fiber laser optics

Approved for use in leading brand fiber lasers, the Mate 1 Micron Optics fused silica lenses and mirrors are the best performing optics with superior coating and low absorption. The lens has a superior high reflection coating for high power fiber laser.
